

Restaurant Pagers

GuestCall ServerCall Push Button Paging 2-Way Radios LiteCall GuestCall for fast casual restaurants

An Essential Ingredient for Restaurant Success Are long lines driving guests away from your restaurant? Want the tools to run a more profitable and efficient business? If so, it's time for a restaurant paging system from HME Wireless. Our innovative and comprehensive line of wireless paging systems provide fast and lasting solutions to some of the most common challenges facing restaurateurs.

Each paging system is designed to address an important segment of operations, such as the front-of-the-house seating system like GuestCall or the back-of-the house server paging system like ServerCall.

Better Communications with Guests and Staff

HME paging systems provide faster, quieter and more effective communications than our competitors. Our high quality alpha pagers, numeric pagers and extensive pager models available for each paging system allow you to choose the form of communication you'd like to participate in. As a result, staff can work more efficiently and serve guests effectively.

Faster Table Turns is Great for Business

On a big wait, it's crucial to turn tables quickly to prevent walk-aways. HME GuestCall systems are designed to help your staff communicate and work more productively to turn tables faster and serve more guests than before.

Better Service Means Higher Profits

Happy guests translate to returning customers. In an industry where customer service can make or break a restaurant, it pays to invest in an HME Wireless restaurant paging system to improve the quality and speed of service. Plus, you can use HME Wireless paging systems to promote menu specials and further boost the bottom line.
